

Nicole,

There was an incident in July 2018 where an updated Google algorithm caused old stories that had been archived on www.Good4Utah.com to repopulate. The stories that resurfaced had been archived without a post date; which is where the error occurred. One such story centered on a data breach and mentioned America First Credit Union. Best estimation is that this story was four years old.

I received a phone call from you alerting us to this story appearing on Good4Utah.com. I immediately called our news director, George Severson. He was able to log in and find this story and ascertain what had happened. He immediately deleted the story from archives to insure no further errors may occur.

We do apologize that this happened. We value your partnership and would never do anything to jeopardize it.

Best,

Curt McDaniel
